EXTERNAL CHAFF CHUTE

"We knew it had been tested for years, which gives you confidence, and it seemed that they had a lot better capacity. The size of the throat, where the material goes down into the mill, is huge!"

- Sandy Day, Riverina, NSW

"Burning windrows would normally take a couple of weeks and a lot of late nights. Now that we have the Seed Destructor, we've saved organic matter, labour and time, not to mention a plus for the environment."

- Roger Dring, Carnamah WA

"It's a bit addictive. You see some ryegrass near the gate so you drive the header over there to make sure you get it and then keep going. You know that at least 99% of all the weeds that go through the front aren't going to germinate."

- Ian Knapp, Katanning WA
